MINE CLOSURE PLANNING

Minserve

THE MINSERVE GROUP

The Minserve Group was founded in 1989 to provide expert mining advisory services to all levels of the mining sector. As the industry has evolved, Minserve has been at the forefront of this progression, working with some of the world's leading operations. This has given Minserve the tools and experience to provide industry leading solutions to any mining situation.

Minserve members apply practical, executable mine planning and mine operational skills to closure design and costing. Minserve has prepared and supported clients in submitting numerous ERC and PRCP applications including some of the largest open cut sites in Queensland. We understand the deliverables required from the data supplied and complete all facets of the deliverables in house.

TOOLS WE USE

Vulcan	Unity	Spry
Deswik	XPAC & TALPAC	HaulSIM

GROUP CAPABILITY

Rehabilitation Plans
Analyse life of mine plans and create progressive rehabilitation schedules, domains and milestones for Queensland Government Progressive Rehabilitation Closure Plans (PRCP).

Mine Closure Planning
Develop site wide closure plans with costing for earthworks considering geotechnical, hydrogeological and environmental inputs.

Rehabilitation Cost Modelling
Prepare Spatial Data for Queensland Estimated Rehabilitation Costs Calculator (ERC)

3D Modelling
Create 3d presentations for stakeholder engagement, including 3d model fly-throughs and still time lapse imagery.
